

SURVEY SERVICES

A construction site with a level and concrete piles. The level is a long, black, rectangular tool with several circular vials containing liquid and a bubble. It is placed on top of three large, cylindrical concrete piles. The background shows a dirt field with some construction equipment and a vehicle.

COMPANY OVERVIEW

At Kallar, our Survey Division provides precise and reliable surveying services for construction, fabrication, and industrial projects.

We specialize in large pile projects, offering accurate layout, verification, and as-built reporting to support complex foundation work.

Our team combines advanced technology with field expertise to deliver results safely, efficiently, and with the highest level of accuracy.
